**Subject:** RE: Do u have an estimate of total methane for the basin?  
[EmissionReductionAnalysis 4.18.16.xlsx](#)

I'm trying to figure that out right now. Cindy's spreadsheets are making my head hurt (attached). I'm looking at the FLIGHT tool for operators that reported under the GHG Reporting Rule. That gave me 649,927 metric tons of CO2e for Carbon, Duchesne, and Uintah Counties, but the data show those are emissions from primarily major sources (I recognize them by name). We had basically figured a methane emissions reduced number from the VOC emissions reduced number we had calculated, but do not have a basin total of methane emissions.

Thanks,

Claudia
